

1. Wandle in die gefragte Sorte um!

$$\frac{1}{25} \text{ kg} = 40 \text{ g}$$

$$\frac{1}{5} \text{ hl} = 20 \text{ dm}^3$$

$$\frac{1}{8} \text{ m} = 12,5 \text{ cm}$$

$$\frac{1}{2} \text{ dl} = 50 \text{ ml}$$

$$\frac{1}{4} \text{ cm} = 2'500 \text{ } \mu\text{m}$$

$$\frac{3}{4} \text{ hl} = 75 \text{ l}$$

$$\frac{5}{8} \text{ g} = 625'000 \text{ } \mu\text{g}$$

2. Verwandle in die gefragte Sorte und in einen Bruch.

$$0,05 \text{ kg} = 50 \text{ g} = \frac{1}{20} \text{ kg}$$

$$20 \text{ m} = 20'000 \text{ mm} = \frac{1}{50} \text{ km}$$

$$10 \text{ mm}^2 = 0,001 \text{ dm}^2 = \frac{1}{1000} \text{ dm}^2$$

$$40 \text{ dm}^3 = 4'000 \text{ cl} = \frac{2}{5} \text{ hl}$$

$$0,012 \text{ g} = 12 \text{ mg} = \frac{3}{250} \text{ g}$$

$$5 \text{ cl} = 50 \text{ cm}^3 = \frac{1}{20} \text{ l}$$

$$0,3 \text{ cm}^3 = 300 \text{ } \mu\text{l} = \frac{3}{10} \text{ ml}$$
